

# **Corporate Social Responsibility**

Presentation – 2025

# HISTORICAL

Due to the diversity of activities carried out within the Deslog Group, each company has historically developed CSR initiatives specific to its challenges.

The year 2023 was marked by the decision to launch and structure a global CSR policy at group level.

**LAUNCH OF THE  
CSR APPROACH**

# STRUCTURE

After carrying out an initial flash CSR diagnosis and a carbon footprint, we are taking a new step at the start of 2024 with the creation of a CSR department and the recruitment of a Group CSR manager.

We have also appointed a CSR coordinator in each Group company to facilitate communication and exchanges on this topic.

At the end of the first semester we wrote our commitments for the group, and drew up our roadmap for the years to come.

# OUR COMMITMENTS

The Deslog Group is committed to providing its customers with the carbon footprint of each shipment and to reducing its greenhouse gas emissions. Deslog is committed to reducing the energy consumption of its sites and developing the production of renewable energy. The Group has set itself the objective of obtaining a CSR label adapted to its activity and to propose, whenever possible, a low-carbon freight offer.

In line with the Group's values, Deslog is committed to continuously improving the quality of working life and facilitating career development for its employees. In the near future, the Group will be setting up an annual social barometer and initiating a process of reflection on sustainable employee mobility.

The Deslog Group intends to pursue its commitment to the economic and social development of the regions in which it operates, and to strengthen its contribution to professional integration.

# OUR GOALS

Set up turnover indicators

Launch a study on employee mobility

Set up an annual social barometer

A low-carbon offering

Define a sustainable purchasing charter

Supporting employee initiatives in the environmental field

**2025**

Produce 25% renewable energy at 4 of our sites

**2027**

**2024**

Monitor sponsorship initiatives

Automate GHG information for customers

Draw up a non-discrimination and harassment charter

Publish the professional equality index

**2026**

Setting up the CSRD

**2030**

-23% de GHG on Destock Logistique

-40% energy consumption on logistics sites

# A WORD FROM OUR CSR MANAGER

“

*The Deslog Group is aware of its social and environmental influence, and aims to reduce its negative impact while increasing its positive spin-offs.*

*Transport and logistics are essential links in the functioning of most of our society's activities, so it's vital to involve the other players in this chain to bring about significant change, and collectively improve our sector's practices.*

”
